## Reasoning and Problem Solving Step 9: Fractions of a Quantity

## National Curriculum Objectives:

Mathematics Year 4: (4F2) Recognise and show, using diagrams, families of common equivalent fractions
Mathematics Year 4: (4F10a) Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number

## Differentiation:

Questions 1, 4 and 7 (Problem Solving)
Developing Calculate a given amount when finding fractions of quantities. Involves unit fractions only.
Expected Calculate a given amount when finding fractions of quantities. Involves non-unit fractions in their simplest form.
Greater Depth Calculate a given amount when finding fractions of quantities. Involves non-unit fractions that need to be simplified first.

Questions 2, 5 and 8 (Reasoning)
Developing Solve a word problem when finding a fraction of a quantity. Involves unit fractions only.
Expected Solve a word problem when finding a fraction of a quantity. Involves non-unit fractions in their simplest form.
Greater Depth Solve a multi-step word problem when finding a fraction of a quantity. Involves non-unit fractions that need to be simplified first or use of related facts.

Questions 3, 6 and 9 (Reasoning)
Developing Decide which statement is correct when finding fractions of quantities. Involves unit fractions only.
Expected Decide which statement is correct when finding fractions of quantities. Involves non-unit fractions in their simplest form.
Greater Depth Decide which statement is correct when finding fractions of quantities. Involves non-unit fractions that need to be simplified first or use of related facts.

## More Year 4 Fractions resources.

1a. Below is the recipe for 18 oat pancakes. Kelly only needs to make $\frac{1}{2}$ of that number of pancakes.

| Oat Pancake Ingredients |
| :--- |
| 4 eggs |
| 120 g oats |
| 60 ml milk |
| 2 bananas |

How much of each ingredient will she need?

2a. Tom is making a stew. The recipe says to use $\frac{1}{4}$ the amount of potatoes as peppers. Tom uses 16 peppers but he's unsure of how many potatoes to use.

How many potatoes does Tom need?
Show your working.

3a. Alice and Chuan are calculating $\frac{1}{5}$ of 35 .

The answer is 7.

Who is correct? Explain how you know.

1b. Below is the recipe for 4 smoothies. Gabriel only needs to make $\frac{1}{4}$ of that amount of smoothie.

## Smoothie Ingredients

20 strawberries 4 bananas
400 ml of milk
24 raspberries
How much of each ingredient will he need?

2b. Tina is making a fruit salad. The recipe says to use $\frac{1}{2}$ the amount of melons as apples. Tina uses 12 apples but she's unsure of how many melons to use.

How many melons does Tina need? Show your working.

3b. Hannah and Sean are calculating $\frac{1}{4}$ of 28.

Who is correct? Explain how you know.

4a. Below is the recipe for 4 cupcakes. Lucy only needs to make 3 cupcakes.
Cupcake Ingredients
4 eggs
200 g self-raising flour
100 g butter
80 g sugar

How much of each ingredient will she need?

5a. Tim is making a sauce. The recipe says to use $\frac{2}{3}$ the amount of carrots as tomatoes. Tim uses 15 tomatoes but he's unsure of how many carrots to use.

How many carrots does Tim need?
Explain how you know.

6a. Hafsa and Gabriel are calculating $\frac{5}{6}$ of 48.

Who is correct? Explain how you know.

4b. Below is the recipe for 3 cookies. Sean only needs to make 2 cookies.

## Cookie Ingredients

3 eggs
120 g plain flour 90 g butter
75 g sugar
How much of each ingredient will he need?

5b. Tara is making a marmalade. The recipe says to use $\frac{5}{6}$ the amount of lemons as oranges. Tara uses 18 oranges but she's unsure of how many lemons to use.

How many lemons does Tara need? Explain how you know.

6b. Sinead and Johnny are calculating $\frac{2}{5}$ of 35 .

Who is correct? Explain how you know.

7a. Below is the recipe for 36 blueberry muffins. Jo only needs to make 30 muffins.

```
Muffin Ingredients
6 eggs
240g all-purpose flour
180g butter
120g sugar
60g blueberries
```

How much of each ingredient will she need?

7b. Below is the recipe for 45 flapjacks. Ben only needs to make 36 flapjacks.

$$
\begin{aligned}
& \text { Flapiack Ingredients } \\
& 175 \mathrm{~g} \text { oats } \\
& 125 \mathrm{~g} \text { butter } \\
& 100 \mathrm{~g} \text { sugar } \\
& 5 \text { tbsp golden syrup } \\
& 50 \mathrm{~g} \text { dried fruit } \\
& \hline
\end{aligned}
$$

How much of each ingredient will he need?

8 a . Todd is making 6 pies. The recipe says to use $\frac{3}{7}$ the amount of pears as plums for each pie. Todd uses 14 plums for a pie but he's unsure of how many pears to use.

How many pears does Todd need for 6 pies? Explain how you know.

9a. Steph and Cian calculated $\frac{6}{8}$ of 32 .

The answer is the same as $\frac{2}{8}$ of 96 .

Cian
Who is correct? Explain how you know.

8 b . Tera is making soup for 8 . The recipe says to use $\frac{2}{9}$ the amount of chillies as garlic for each person. Tera uses 18 garlic pieces for 2 people but she's unsure of how many chillies to use.

How many chillies does Tera need for 8 portions of soup? Explain how you know.

9b. Isabel and Jake calculated $\frac{4}{12}$ of 72 .

I can multiply the answer by 10 to calculate $\frac{8}{12}$ of 720 . Jake

Who is correct? Explain how you know. G

# Reasoning and Problem Solving Fractions of a Quantity 

## Reasoning and Problem Solving Fractions of a Quantity

## Developing

1 a. 2 eggs, 60 g of oats, 30 ml of milk, 1 banana.

2a. Tom needs 4 potatoes because
$16 \div 4=4$ and $4 \times 1=4$.
3a. Chuan is correct. Alice has taken one fifth away from 35.

## Expected

4 a .3 eggs, 150 g of self-raising flour, 75 g of butter and 60 g of sugar.

5 a . Tim needs 10 carrots because
$15 \div 3=5$ and $5 \times 2=10$.
6a. Hafsa is correct. Gabriel has only calculated one quarter of 48.

## Greater Depth

7 a .5 eggs, 200 g flour, 150 g butter, 100 g sugar, 50 g blueberries.
8 a. Todd needs 36 pears in total because $\frac{3}{7}$ of 14 is 6 . That's enough pears for 1 pie but because Todd is making 6 pies, he needs to multiple 6 by 6 to get 36 pears in total. 9 a. Cian is correct because 96 is three times larger than 32 and the fraction is three times smaller so it will produce the same answer.

## Developing

1b. 5 strawberries, 1 banana, 100 ml of milk, 6 raspberries

2b. Tina needs 6 melons because
$12 \div 2=6$ and $6 \times 1=6$.
3b. Hannah is correct. Sean has calculated half of 28.

## Expected

4b. 2 eggs, 80 g of plain flour, 60 g of butter and 50 g of sugar
5b. Tara needs 15 lemons because $18 \div 6=3$ and $3 \times 5=15$.

6b. Johnny is correct. Sinead has calculated three fifths of 35 .

## Greater Depth

7 b .140 g oats, 100 g of butter, 80 g of sugar 4 tbsp of golden syrup and 40 g of dried fruit.
8b. Tera needs 16 chillies in total because $\frac{2}{9}$ of 18 is 4 . That's enough chillies for 2 people but because Tera is making 6 soup for 8 people, she needs to multiple 4 by 4 to get 16 chillies in total.

9b. Isabel is correct because 36 is half of 72 and the fraction is double the original so it will produce the same answer.
