

L.O. Can I use my knowledge of times tables to find equivalent fractions?

Pictorial representation	Equivalent fractions
	$\frac{\boxed{1}}{\boxed{4}} = \frac{\boxed{2}}{\boxed{8}}$
	$\frac{4}{10} = \frac{2}{\boxed{5}}$
	$\frac{\boxed{1}}{4} = \frac{\boxed{2}}{2}$
	$\frac{\boxed{1}}{\boxed{3}} = \frac{1}{3}$
	$\frac{\boxed{3}}{\boxed{5}} = \frac{\boxed{3}}{5}$
	$\frac{\boxed{3}}{4} = \frac{\boxed{15}}{\boxed{20}}$
