

Y2 – Autumn – Block 1 – Step 4 – Use a place value chart Answers

Question	Answer								
1	<p>a) There are 5 tens and 3 ones. The number is 53</p> <p>b) There are 3 tens and 5 ones. The number is 35</p> <p>Both place value charts have 3 in one column and 5 in the other, but they are the opposite way round.</p>								
2	<p>a) </p> <p>b) </p>								
3	<p>Both place value charts show the number 32, with 3 in the tens column and 2 in the ones column, but the first chart use base 10 and the second chart uses numerals.</p>								
4	<p>a) There are 2 tens and 6 ones. The number is 26</p> <p>b) There are 3 tens and 0 ones. The number is 30</p> <p>c) There are 0 tens and 9 ones. The number is 9</p>								
5	<p>a) <table border="1" data-bbox="259 1259 518 1353"> <tr> <th>Tens</th> <th>Ones</th> </tr> <tr> <td>9</td> <td>4</td> </tr> </table> The number is 94</p> <p>b) <table border="1" data-bbox="259 1411 518 1504"> <tr> <th>Tens</th> <th>Ones</th> </tr> <tr> <td>7</td> <td>5</td> </tr> </table> There are 7 tens and 5 ones.</p>	Tens	Ones	9	4	Tens	Ones	7	5
Tens	Ones								
9	4								
Tens	Ones								
7	5								
6	<p>Yes</p> <p>The number of ones is given before the number of tens, but this does not affect the order of the numerals in the number.</p>
