Divide 2-Digits by 1-Digit 1

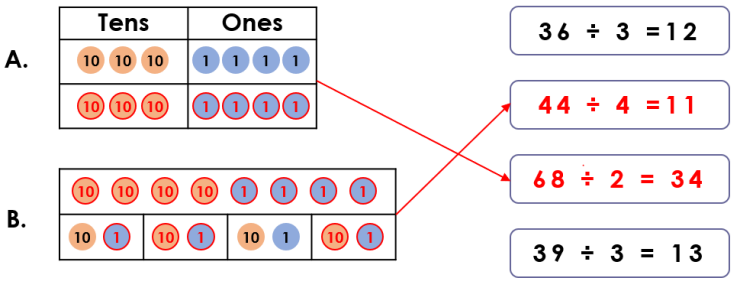
Expected

4. False. C represents 66 divided by 3 not 60 divided by 3.

5. The images should be completed as shown below:



As shown above, A. 68 ÷ 2 = 34; B. 44 ÷ 4 = 11

6. Lydia is incorrect, because 8 equal groups of 10 equal 80, not 88. Lydia would have been correct if she had said that '88 can be divided into 8 equal groups of 11.'
