

# Order Numbers up to 1,000

1. Star has lived in six different houses. She has written the house number for each house in ascending order, but she has made a mistake.

116,

119,

251,

241,

423,

578

Write the sequence in the correct order.

VF

2. Five children are playing a video game. The winner is the player who collects the most yellow shells in the obstacle course.

The results are given below. Order them from greatest to smallest.

Felix = 623

Ruby = 930

Alisha = 292

Lucas = 581

Star = 273

\_\_\_\_\_

Who finished in third place?

VF

3. Use the digit cards below to fill in the gaps and create five 3-digit numbers that are in descending order.

33 \_\_, 3 \_\_ 2, \_\_ 61, 1 \_\_ 4, 10 \_\_

6

1

5

2

3

8

You may only use each digit card once, but you do not have to use every digit card.

PS
