

# Four-in-a-Row

Multiplication up to  $6 \times 6$

You will need:

Players: 2

- 2 dice
- a different coloured crayon for each player

- 1) Roll the two dice and multiply the two numbers.
- 2) Then, find the answer on the grid and colour it in your chosen colour to 'claim it'.
- 3) If an answer has already been claimed, play passes to the next player.
- 4) Continue play until a player gets four-in-a-row, diagonally, to win the game.
