

Using the Language of 'More' and 'Fewer'

Home Learning Challenges

Play a comparison game while having a snack. Open a box of raisins (or other small treats) and give some to your grown-up and some to yourself. Who has more? Who has fewer? Then, eat some of the snack. Does the answer change? Who has more or fewer now?

Use some building bricks to have a tower building competition with a grown-up. Which tower has more bricks? Which tower has fewer bricks? What makes you think that? How could you check?

Ask a grown-up to help you look at some coins. Can you find different ways to sort the coins, such as by type or colour? Can you find another way to sort them? Which set has more coins? Which set has fewer coins?

Play a drawing game with a grown-up. On pieces of paper, each draw a space picture. Draw some stars, planets, rockets and aliens. Then, compare your pictures. Who drew more stars? Who drew fewer aliens? Talk about your pictures using the words 'more' and 'fewer'.

Ask some friends and family which they like best, dragons or unicorns? You could draw pictures to help you work out which creature more people like the best. You could tell us what you find out!

Look at the pictures of caterpillars and butterflies above. Can you tell your grown-up about the pictures using the words 'more' and 'fewer'?
